

COSMETIC

"There are no perfect faces," claims Dr. Vijay Sharma, renowned plastic surgeon and Maharashtra Ratna. To prove just that, he goes on to transform star visages, recommending a tuck here, a nip there... The magical metamorphosis begins!

SHAH RUKH:

He has a good personality but he needs to get the heavy tip of his nose sharpened and his weak chin strengthened. If he makes the above changes, he can look as handsome as a Hollywood star!

HRITHIK:

He has an excellent face, one that has been seen in our industry after a very long time. He is extremely good looking. Yet according to an expert's opinion, his flared nostrils require balancing by slicing the extra curves around it. Also his slightly protruding chin needs to be sliced. However, people have accepted him so wholeheartedly, that personally I would advise him against going in for any surgery.

MIRACLES!

AJAY DEVGAN:

Ajay has a bulky nose, a 'pakoda' type, in layman's slang. It desperately needs correction! The ideal ratio between the width of the nose and the lips should be 3:5. In Ajay's case the base of his nose is as wide as his smile. His face cut is very good, and his eyes are definitely his best feature. His eyes speak. If he makes the necessary changes he can look very handsome.

ESHA DEOL:

Wish she had bigger eyes like her mother! She needs a slim eyelid job to widen her eyes. I have also sharpened her nose and jaw-line to make her face oval like Ash's. If she makes the necessary changes she will definitely transform into as beautiful a woman as her mother, whom I still consider one of the most beautiful women in the world!

AISHWARYA:

She is beautiful. Her face is almost perfect. However, when she smiles the furrows on her nose and the widening of her nostrils, look slightly unattractive. This needs to be corrected. Her upper lip also needs slicing. Her best features are her beautiful eyes and the perfectly oval shape of her face.

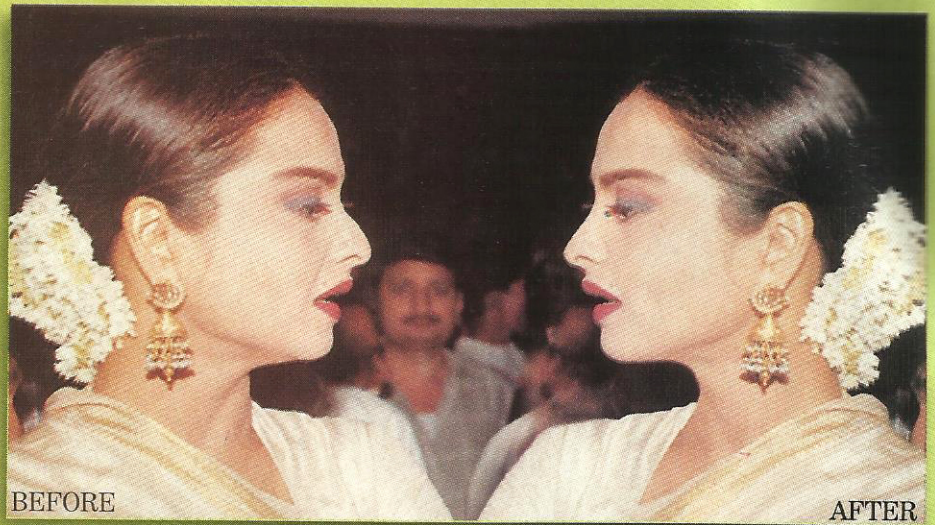

SALMAN:

Salman is a good-looking man but he needs to correct his upturned nose with the slightly bulky tip, which give the impression of marginally lop-sided lips. If he corrected this slight flaw, he would look like a Hollywood hero.

REKHA:

To maintain the richness of her looks, she needs to have her double chin removed, and her curved hook nose (similar to Shah Rukh's) corrected. This way she may prolong her looks for an extended period.

SUNIL SHETTY:

He has unbalanced eyes – they are not in perfect alignment. This needs correction, as do the superfluous nasal folds. Sunil has a blend of innocent and roguish looks, making him equally convincing as a hero and as a villain.

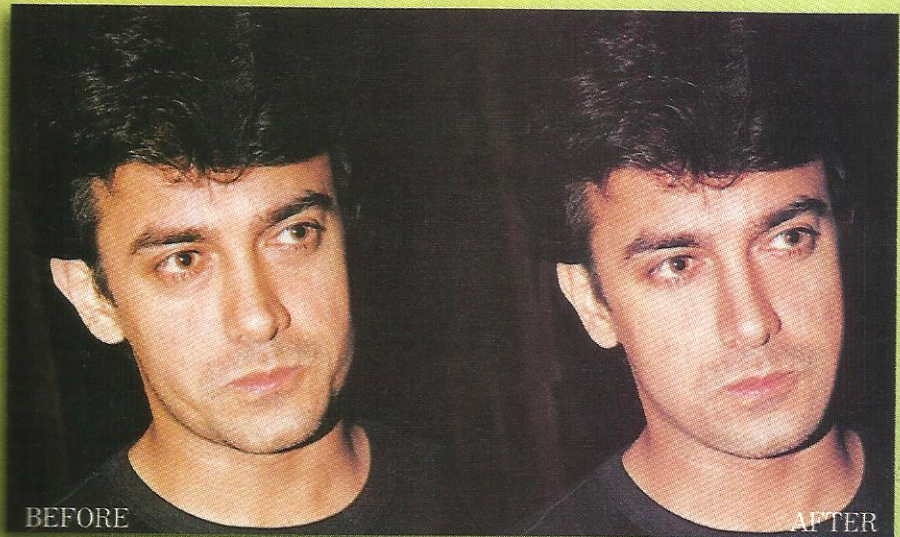

RAVEENA:

I have filed her heavy jaw, removed the smile lines around her mouth and filed the tip of her nose. Raveena has an average face but very naughty eyes.

AAMIR:

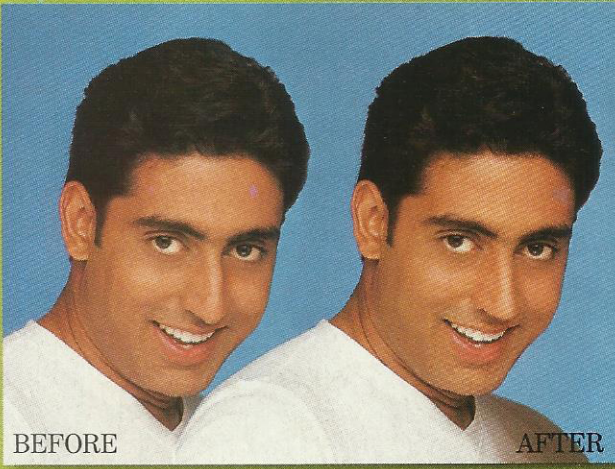

The early hints of aging on his cheeks need to be tightened. His ears which protrude slightly, need to be pulled back by a few centimeters. A little filing of the nose is also required. Otherwise, he has a very charming face.

KAJOL:

Her whole face needs to be worked at. I would remove her dark circles and correct her bulky nose. She is accepted and is doing well but she is not beautiful, per se. She has a very expressive face, which makes her very attractive.

ABHISHEK BACHCHAN:

Abhishek may not be conventionally good looking but he has an interesting face. His eyes are very expressive, just like his parents. He has a prominent 'parrot beak' nose deformity, quite common with good height. Once it is countered by a good nose job, it will enhance his looks, creating a more youthful appearance. Abhishek still has boyish looks but the passing years will see his face grow better.

KAREENA:

If she gets her jaw-line and nose fixed like her sister, she can look even more beautiful. Her nose is slightly puffy, which I have corrected by a slight trimming. Her extra-fleshy cheeks have been filed and her smile has been balanced. She is definitely star material and she will mature into a beautiful woman.

RAHUL DEV:

His hollow cheeks give the impression of vertical scar marks, but this can be corrected by filling his cheeks out. His extra long, beaked nose needs to be trimmed slightly. He has a very interesting face, though.

Two-in-One In 3 Flavours.

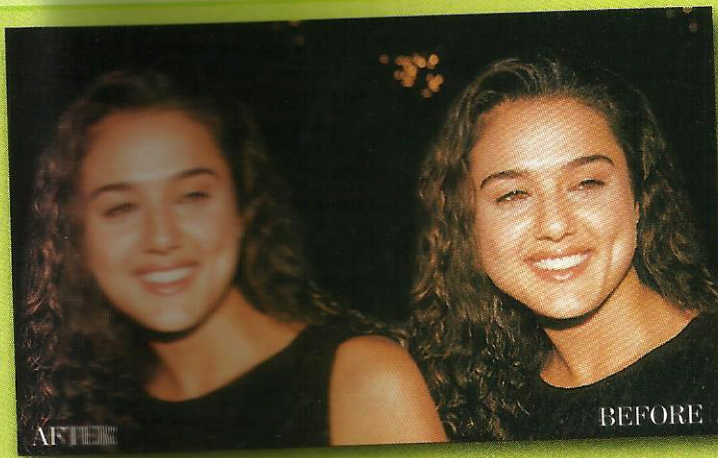

Throat Drops

Soothes throat. Refreshes breath.

PREITY ZINTA:

The lower part of Preity's face is broader than her forehead, but it can be balanced with a little sucking of her jaw. The tip of her bulky nose needs to be sharpened. I have also sliced the extra flesh off her arms giving her posture a lean look. She is not conventionally beautiful but she's definitely very attractive!

RANI MUKHERJEE:

Her *rosogulla* looks need to be given an oval shape by sucking of the fat from her cheeks. She also needs nose designing to straighten the slight curvy nose. Like Kajol, she too is not conventionally beautiful but has an expressive face, which attracts!

TWINKLE:

I'd say her nose has a couple of 'valleys and mountains', which need to be filed. Her chubby face and heavy jaw-line also need to be corrected. She has beautiful almond-shaped eyes, which are slightly small but suit her face, nonetheless. I would say Aishwarya and Twinkle have the most beautiful eyes in the industry.
